REACH and RoHS(3) Compliance Declaration (December 2017)

F.A.O. All Customers,

Burnett & Hillman are dedicated to supplying high quality hydraulic adaptors that meet environmental regulations including RoHS (Restriction of Hazardous Substances) Directive 2002/95EC and RoHS2 Directive 2011/65/EU. This declaration incorporates EU2015/863(RoHS3).

REACH (Registration, Authorisation and Restriction of Chemicals), EU Regulation (EC) 1907/2006.

Unless otherwise agreed all materials used for parts, manufactured or supplied by Burnett & Hillman after February 2006, comply with the relevant RoHS and REACH threshold limits.

RoHS Compliance

- Hexavalent Passivate has been replaced by Trivalent Passivate (currently MacDermid HydroKlad 500)
- Free machining leaded steels used for parts contain max 3500ppm Lead (typically 2800ppm)

REACH Compliance

- Under the structure of REACH regulation Burnett & Hillman are manufacturers and suppliers of 'articles' to our customers, we do not manufacture 'substances' or 'preparations' and our articles do not involve the 'intentional release of substances'. Accordingly we foresee no registration or pre-registration requirements for the products we currently supply.
- Burnett & Hillman will monitor products supplied for the occurrence of 'Substances of Very High Concern' (SVHC), as defined by REACH. This will be an ongoing process as the complete list will be released in stages.

Any further enquiries can be sent by email to adrianparsons@burnettandhillman.co.uk

Thank you for your continued support and understanding,

Adrian Parsons

Quality Assurance & Technical Manager
